

## How do I visit with my loved one?

In addition to calling, sending e-mail, sending letter mail and packages, we are happy to facilitate a virtual connection with your loved one. Using Skype, FaceTime, Zoom, or Google Hangouts we can connect you with your loved one through live video so that you can see your loved one and stay in close contact. Call our Life Enrichment Coordinator to arrange your virtual video visit. If your loved one does not yet have a tablet, iPad, iPhone or laptop, we can facilitate access to one. However, if your loved one does not yet own their own personal device, we highly recommend purchasing one for them. In addition to keeping in touch through video, email, or phone calls, residents enjoy connecting to online enrichment and exercise classes, too.
