

What are residents advised to do to protect themselves?

Residents are encouraged to remain vigilant for, and immediately report, fever or symptoms consistent with Covid-19 (e.g., sore throat, new or worsening cough, shortness of breath, muscle aches). Residents shall be reminded that Public Health Authorities have urged older adults to stay home and limit their interactions with others. Residents are encouraged to remain in their rooms as much as possible, practice physical distancing, and not allow outside visitors into the community. If residents leave their apartment, or are around others, they should wear a cloth face mask, if tolerated, regardless of symptoms.
