

What precautions are you taking to mitigate the spread of the virus?

In addition to maintaining the 6 ft of physical distance and not gathering in groups, we perform symptom screening on all staff, visitors and residents daily. Symptom screening includes temperature checks and symptom checks. We are requiring universal masking of our staff. Essential visitors are required to wash hands and wear face mask while in the building. Staff and essential health care providers at higher risk may be required to wear additional PPE (Personal Protective Equipment). Staff members showing any signs or symptoms are told to stay home and may be asked to obtain a Covid-19 test for diagnostic reasons. Residents who show signs and symptoms are assisted to wear a mask, isolate in their apartment, and shall be closely monitored and facilitated to see their physician for an evaluation. Daily disinfecting of all high-touch surfaces, and more frequent cleaning of all common areas, is a priority.
